- **Frontend:-** HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS, shadcn ui, Ajax, jQuery, API
- **Backend:-** Django and Django Rest Framework
- **Other Skills:** Agile Methodology, Code Formatting, Team Collaboration, Version Control Basics

EDUCATION

B.Tech in Computer Science Engineering || 2021 oct to 2025 June

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Madhya Pradesh

CGPA: 8.57

CERTIFICATIONS

- Completed 102-hour Advanced Java Programming Training at Anudip Foundation (Oct 2024 Nov 2024), covering OOPs, JDBC, Servlet, JSP.
- Completed 15-day Frontend Development Training (HTML, CSS, JavaScript) at Skystar Software, Aug 2023.
- Successfully completed a Certified Workshop on Artificial Intelligence Tools by Skill Nation on 18th December 2024
- Earned certificates in JavaScript, C++, and HTML & CSS from Great Learning

PROFILE

- I have recently completed my B.Tech in Computer Science Engineering. During my studies, I developed a strong interest in web development and gained practical experience by working on various live projects, including personal and client-based work. I also completed certifications in frontend and full stack development to improve my skills.
- I was awarded Excellence in Academics for two years in a row. I also did an internship at Konnections India, where I learned how real-world projects are built and how teams work using agile methods. I'm now looking forward to joining a team where I can keep learning and grow as a developer.

INTERNSHIP EXPERIENCE

- **Konnections India company (Mumbai) JAN 2024 – MAY 2024**
Web Development Intern
 - Learned to work in a production environment, gaining hands-on experience with programming languages, payment gateway integration, and other real world development practices.
 - Participated in daily stand-up calls, sharing progress and planning next steps — following agile methodology and team collaboration practices.
 - Gained hands-on experience with AJAX, PHP, JavaScript, HTML, CSS, Bootstrap, and jQuery through guided training and practical implementation.
 - Contributed to a live jewelry eCommerce website, implementing payment gateway integration and developing a secure multi-step login/signup system using PHP, SQL, AJAX, and JavaScript

LIVE PROJECTS & FREELANCE WORK

- **Patwa Bartan Bhandar – Utensils E-commerce Website with Inventory System**
 - Built a fully responsive utensils e-commerce website with category-wise product management and real-time data integration using Firebase.
 - Developed a custom Admin Panel to manage products, monitor logged-in users, and track cart activity dynamically.
 - Enabled product add/edit/delete functionalities, Google Sign-Up authentication, and Cloudinary-based image upload system for optimized media management.
 - Integrated WhatsApp ordering flow for easy product booking and pickup coordination.
 - Focused on user experience and pricing transparency to promote the brand's value-driven product offering.
- **Durga Mata Committee Website – Religious & Cultural Platform**
 - Developed a fully responsive website to showcase cultural values, festival updates, and event information to a global audience.
 - Implemented a real-time notice and announcement section using Firebase for instant updates on event timings and committee activities.
 - Designed a secure donation module with detailed usage transparency to encourage contributions from devotees worldwide.
 - The website includes a Contact Us and Location section so people can easily find and reach the village temple.
 - Purpose-built to support the global outreach and digital presence of the committee with a clean, user-friendly interface.
- **Loan/EMI Management System**
 - Developed a user-friendly system with daily EMI tracking, allowing users to securely log in and view payment history by date, including real-time updates.
 - Built an admin panel to manage clients, update daily installments, and maintain transparent financial records — enhancing accuracy and efficiency in loan tracking.
